Hode

Head

All since Kendal CC explored Råggejavre-raige (RJR) there has been a dream among Norwegian cavers to do the through trip. It was the entry of the single rope technique into modern caving that made it possible for 3 cavers and a climber to do the cave this summer. Besides the authors, Ragnar Amundsen from Hellemofjord joined the expedition on one occasion. - Our warm gratitude goes to the Amundsen family for their hospitality and for providing transport.
