Beiarn - stedet som har innendørs isklatring

Beiarn - indoors ice-climbing

Five cavers from BOBTOG and STUF went through the Rønnali system in Gråtådalen in Beiarn, from the en¬trance at Smiths Cave to the exit at Rønnalihølet, on the 5th. of March. The trip was a great experience as the ri¬ver and pitches were frozen. The trip became almost an indoors ice-climbing expedition, viz. front cover.
