Setergrotta

Setergrotta

Setergrotta is one of Ranas largest caves, surveyed to 4000 meters. The cave is suitable for cavers with short experience and there is almost no climbing. It is dominated by huge block-filled chambers, but has also tight passages and an active stream. The entrance is located at 110 meters asl, in a sump divers have been down to 19 meters.

Setergrotta is also a tourist cave (June-August), and in this period it is necessary to make an appointment with the people who organizes trips to avoid conflicts. In wet periods part of the cave can be flooded in few hours.
